SETTING THE STANDARDS IN SITE DUMPER INNOVATION

- Rugged telescop design and chassis fabrication for unrivalled reliability
- Forward and centre tipping mechanisms to suit every application
- High-performance disc brakes for reduced stopping distances
- Hazard detection capability for improved site safety
- Stop/start control for increased efficiency and increased service intervals
- Folding ROPS for ease of transportation
- Capture telematics system for precise fleet insight
- Large opening service doors for best in class service access
- High-performance, water-cooled diesel engines for efficient operation
- Market-leading ground clearance for superior off-road performance
- Autoshift technology for increased performance
- Market-leading ground clearance for superior off-road performance

Site Dumper
Site Dumper

Robust, reliable and rental tough, Mecalac site dumpers have been developed using more than 60 years’
design and manufacturing expertise.

Featuring state-of-the-art engine technology to meet the latest emissions compliance, each model delivers
power, torque and exceptional performance for greater operator productivity and profitability.

Designed with the user in mind, Mecalac site dumpers boast class-leading skip strengths, heavy-duty
chassis designs and user-friendly controls. It’s easy to see why each model leads its class in on-site
performance.

First-to-market technology additions – including Autoshift transmission, Stop/Start Control, Hazard
Detection and Capture telematics – complete the package. From one to ten-tonne payloads, Mecalac’s
extensive model line-up has the perfect unit for every application.

ROBUST AND RELIABLE

POWER TIP SITE DUMPERS

Mecalac Power Tip site dumpers are designed to move material quickly and effectively. From one to
ten-tonne payloads, each unit delivers outstanding power and performance.

Featuring state-of-the-art operator technologies, including Start/Stop Control, Autoshift, Capture and
Hazard Detection, Power Tip site dumpers set the standards for equipment innovation and performance.

All models are equipped with Tier 4-Final engines, ensuring they meet the highest global emissions
standards without the need for exhaust after-treatment.

With an industry-leading skip wall thickness, heavy-duty steel plates and rental-tough tipping mechanisms,
Mecalac site dumpers are designed with reliability in mind. Clever design and the latest technologies ensure
smooth and accurate material placement.

Key model benefits:
• Efficient operation
• Improved performance
• Simple operation

• Unrivalled reliability
• Longer service intervals
• Outstanding fuel economy

SPEED AND POWER

ROBUST AND RELIABLE

POWER TIP SITE DUMPERS

Mecalac Power Tip site dumpers are designed to move material quickly and effectively. From one to
ten-tonne payloads, each unit delivers outstanding power and performance.

Featuring state-of-the-art operator technologies, including Start/Stop Control, Autoshift, Capture and
Hazard Detection, Power Tip site dumpers set the standards for equipment innovation and performance.

All models are equipped with Tier 4-Final engines, ensuring they meet the highest global emissions
standards without the need for exhaust after-treatment.

With an industry-leading skip wall thickness, heavy-duty steel plates and rental-tough tipping mechanisms,
Mecalac site dumpers are designed with reliability in mind. Clever design and the latest technologies ensure
smooth and accurate material placement.

Key model benefits:
• Efficient operation
• Improved performance
• Simple operation

• Unrivalled reliability
• Longer service intervals
• Outstanding fuel economy
Mecalac High Discharge site dumpers are designed to deliver superior versatility and performance when tipping over obstacles and into skips. From 1,000-2,000kg payloads, each model has been developed for use in smaller sites – such as housing developments and landscaping projects. All models deliver an impressive height clearance of over 1.5 metres, providing impressive results in confined spaces.

A robust chassis and skip design ensures that the unit remains well balanced and secure while tipping, assuring safe and effective operation.

All Mecalac High Discharge site dumpers feature a folding ROPS to enable easy access into tight spaces. The smallest model in the range, the TA1EH, is capable of passing through a standard one-metre-wide doorway when fitted with optional narrow-width wheels and tyres.

What this means for you:

- Superior performance
- Suitability for every scenario
- Efficient operation
- Improved performance
- Simple operation
- Unrivalled reliability
- Longer service intervals
- Outstanding fuel economy

High Discharge site dumpers
Outstanding accessibility

Mecalac Power Swivel site dumpers are the ideal solution for more challenging jobs. Allowing the load to be rotated before being tipped, Power Swivel technology allows the operator to work within a confined site area.

With payload options ranging between two to six tonnes, there’s a perfect Power Swivel model for every application. High quality slew ring bearings deliver smooth and effective operation – ensuring precise placement of loads.

Featuring state-of-the-art operator technologies, including Start/Stop Control, Autoshift, Capture and Hazard Detection, Power Swivel site dumpers set the standards for equipment innovation and performance.

All models are equipped with Tier 4-Final engines, ensuring they meet the highest global emissions standards without the need for exhaust after-treatment.

All Power Swivel site dumpers feature a heavy-duty locking device, which keeps the skip facing forward while on the move – just one of the many features that ensure each model meets the highest level of on-site health and safety compliance.

Intelligent design means hose routings and hydraulics are protected from damage, without compromising on routine maintenance access. Key model benefits:

- Efficient operation
- Improved performance
- Simple operation
- Unrivalled reliability
- Longer service intervals
- Outstanding fuel economy

Meeting outstanding safety standards

Key model benefits:

- Efficient operation
- Improved performance
- Simple operation
- Unrivalled reliability
- Longer service intervals
- Outstanding fuel economy
LEADING THE WAY IN EQUIPMENT CAPABILITY

MAKING MAINTENANCE EASY

Alongside boasting state-of-the-art product design and first-to-market technology innovation, all Mecalac site dumpers feature superb service access from ground level to ensure simple and time-efficient routine equipment maintenance.

The chassis and engine canopies are designed to give maximum access to all service areas, while engine panels are mounted on heavy-duty, lockable hinges for added safety benefits.

MEETING OUTSTANDING SAFETY STANDARDS

On models with payloads from six-tonnes upwards, Mecalac site dumpers feature a suite of state-of-the-art technologies to deliver outstanding results.

Stop/Start Control has been designed to improve on-site safety, minimise fuel consumption and increase service intervals. The new system will automatically start and stop the engine in predetermined conditions. Tested duty cycles have shown hundreds of pounds of fuel savings per year, as well as extending service intervals by 26 weeks (on a typical 500-hour maintenance schedule).

Developed in-house by Mecalac’s engineering department, Autoshift uses torque demand to guide gear changes. In challenging and demanding conditions – such as steep gradients and high payloads – Autoshift enables the transmission to hold lower gears for longer, providing torque, power and drive when it’s needed most.

Bringing award-winning automotive technology to the construction site, Mecalac’s Hazard Detection solution uses a microwave radar to provide flawless obstacle detection. Capture is Mecalac’s innovative telematics solution, allowing hire firms and site managers to monitor unit location, distance travelled and hours completed each day. Integration with the ECU affords access to real-time fuel consumption data logs, service planning functionality and geo-fencing reporting to within three metres.
